NOSHIN SYARA

Software Engineer & Full-Stack Developer | CSE Student

Third-year CSE student at IUT who builds across the stack: React and TypeScript frontends, Node, Spring Boot, Django and Go backends, and Flutter mobile apps. I have shipped client-facing work in a paid frontend internship and several full-stack products with dashboards, real-time features and maps. I also enjoy R&D and hardware-linked software from robotics team work, and I'm looking for real production experience on client SaaS and digital products.
